A wide-angle photograph of the Shenzhen skyline across a body of water. The city's dense urban landscape, including numerous skyscrapers, is visible in the background. In the foreground, a large cable-stayed bridge with two prominent white pylons spans the water. The sky is a clear, vibrant blue with a few wispy clouds on the left side.

**Shenzhen
International Low Carbon City (SILCC)
Forum**

Under the guidance of the National Development and Reform Commission (NDRC) and the People's Government of Guangdong Province, Shenzhen International Low Carbon City Forum was established in June 2013.

For the past four years, the forum has achieved great success and positive response worldwide: the first carbon market of China started from here, Blue Sky Award for global cutting-edge technologies in renewable energy was released here, and the National Low Carbon Technology Exhibition made its debut here.

In addition, 4000 distinguished guests around the world, including governmental officials, well-known experts, and famous entrepreneurs have shared their insights and wisdom here. Shenzhen International Low Carbon City forum has been Constructed as an important platform for all parties to discuss frontier topics, share intellectual achievements, and develop practical cooperation.
