Health Commission of Zhejiang Province

An Invitation for Italy-Zhejiang Online Medical Supply Fair

Dear Sir/Madam,

The Health Commission of Zhejiang Province of China would like to extend an invitation for an online medical supply fair, to be held during April 16th to 22nd. The fair, co-organized by the Department of Commerce and the Health Commission of Zhejiang Province, has been well-supported by many of our local medical supply companies. Aiming at COVID-19, the fair offers an exclusive source for hospitals, public health institutions and health authorities to search for medical products for personal protection and clinical diagnosis & treatment, including masks, protective suits, test kits, thermometers and respirators. All products are produced by qualified manufacturers and have been carefully selected by the fair organizers.

At the time of the current global pandemic challenge, it is hoped that this fair would be able to help those most in need with armors and munitions to win the battle against the pandemic. Please see attached a non-exhaustive product list for your reference. Should you be interested in attending the fair or require further information, please feel free to contact us via intlofficemse@zjwjw.gov.cn.

Best regards

Division of International Cooperation
