Job Description

Position: Junior Homologation Engineer

Job Description (100 words):

The junior homologation engineer will manage the homologation requests and follow up the client's needs and requirements. A successful homologation engineer will be highly organized and self-motivated, must work well independently and at the same time coordinate with an area manager and a greater international team, including colleagues and executives in the San Marino Headquarters. The following tasks will be performed:

- Arrange and conduct tests that are part of the homologation process;
- Create compliance test reports and regulatory documentation;
- Pro-actively follow up and solve the client's needs and requirements;
- Contribute and support ideas to improve the business;
- Represent ATS at key industry events as required (in China and Internationally);
- Monitor global regulations, ensuring changes are communicated to ATS managers and colleagues;
- Maintain positive government relations at all times.

Job location: Chongqing

Type of job (full-time, part-time, internship): Full-time

Required experience: 2/3 years of experience in homologation within the automotive industry

Starting date: Now

Salary (if indicated): The salary is related to the experience

Candidates' requirements (100 words)

- 2/3 years of experience in homologation within the automotive industry;
- Bachelor's degree in engineering (mechanical or similar);
- Excellent verbal and written skills in both Chinese, English, and Italian;
- Strong analytical skills, organizational skills and attention to details;
- Must be proficient with technology and business software and highly comfortable working with remote teams;
- Relational ability to communicate with different speakers: companies/partner/suppliers/clients
- Problem solving.
