

energy to inspire the world

## Shouxiang SUN (Eric) - VP of Business Development at Snam China

Mr. Eric SUN is VP of Snam China since 2019.

He graduated with excellent grades from Central South University in China and obtained MBA at NEOMA business school in France in 2013. He was admitted to Tsinghua University in 2022 and is studying in PBCSF Finance EMBA program currently.

He began his career in CNPC, gradually advancing to the senior position as Director of Project Financing in 12 years. Prior to joining Snam, he served as VP at one leading solar Chinese private company and oversaw the international investment business.

He joined the Snam China team in 2019, leading investment and energy transition business, including hydrogen, biomethane, sustainable mobility as well as energy efficiency. He has been committed to developing many strategic initiatives (gas infrastructure investment, h2 readiness etc.,) that currently have a significant impact on Snam's sustainable development in China.

He is also a very reliable friends to Italy. In March 2020, when the COVID-19 was raging in Italy, following the mandates from Italian Civil Defense Department and Snam, he voluntary spared no efforts to work for almost 50 consecutive days from day to night and had purchased over 100 ventilators from various manufactories in China for Italy and received special praise from the then CEO of Snam S.p.A.
